Air Extractor Assembly

“Serving the Paper & Converting Industry over 40 Years”

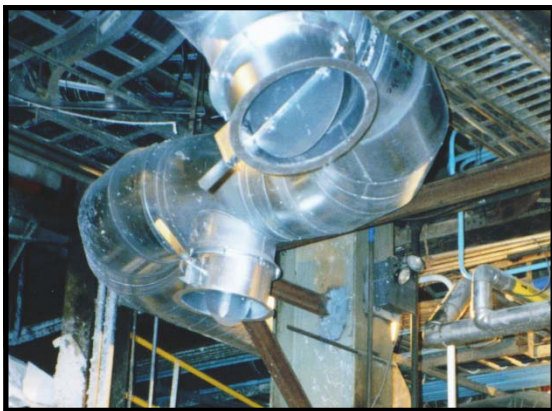

The Air Extractor is an easy retrofit to existing pneumatic conveying system. It removes up to 30% of the system’s CFM without impacting the material flow.

The **Air Extractor System** consists of the following major components:

- Perforated Duct
- Clamshell designed Air Extractor Hood (as shown)
- Quickfitting Duct
- Dust Handling Fan Assembly
- Atmosphere Air Distribution or to a Dust Collection System
- Optional Auto Control Damper for variable CFM applications
